## OBJECTIVE

Looking for a remote entry-level position as a Software Developer in a dynamic firm that values my technical and non-technical skills and provides scope for updating my knowledge, I seek a company that will help me contribute to its development while concurrently aiding my personal growth.

## SKILLS

| Technical Skills | Others |
|---|---|
| ● Typescript<br>● Javascript (ES6+)<br>● React<br>● Node<br>● Html5<br>● Css3<br>● MongoDb | ● Express<br>● Bootstrap<br>● puppeteer<br>● Heroku<br>● Netlify<br>● Styled-Components |

## RELEVANT PROJECTS

**Job Search Web-Scraper |** *full-stack*

Code: front-end | back-end  | Live-site: Demo-URL  | Video: Demo-Video

- Created a full stack application that allows users to search for jobs and track their application process.
- Utilise puppeteer to scrape jobs data in real time from indeed and linkedIn jobs using Node.js.
- Designed a beautiful UI using React and Typescript to display the scraped jobs data.
- Created a NoSQL database to store Jobs a user applied to and keep track of the jobs application status.

**Employee Management System |** *full-stack*

Code: front-end | back-end | Live-site: Demo-URL

- Designed an application that allows organisations to keep track of their employees utilising Node.js, Typescript and React.
- Added leave management to make keeping track of employee leaves easier.
- Utilise Chart.js to show visual representation of employee leaves statistics to the admin in the React front-end.

**Bug Tracker |** *full-stack*

Code: front-end | back-end  | Live-site: Demo-URL  | Video: Demo-Video

-  Planned and built a  web application that allows organisations to keep track of reported bugs and assign them to developers.
- Created REST API utilising Node.js and Express.js to integrate with the React front end.
- Added authorisation to prevent access to certain routes by unauthorised users.
